Some text here. I wonder if this is OK.

It is of course much slower than the lightning fast tup.

ADVANTAGES

- Easily configured.
- Look I cite Lion, Giraffe, and Capybara (2010).
- That means I am awesome.

New check. This ought to update.

Now this works via prose.io which is good for images.

Stackedit has math rendering so that's a huge plus. However it also adds weird cruft to the files. So.. NOT RECOMMENDED.

Plus I know math.

Honest!

$$\int_0^\infty \sin x = ?$$

$\prec$ stands for acessibility. Basically the order relation.

Dillinger has great rendering for math, but no images and it doesn't understand single dollar symbols for math.

Well so what.

That's sort of math as well. Look it up.

I do TeX too

Bye.

Hahaha
